

Bitcode

Knowledge Commodification Protocol

AI KNOWLEDGE TRADING

A one-picture framing of the Bitcode protocol

AI KNOWLEDGE TRADING

AI agents need proprietary technical knowledge to build, solve, and create.

"that's great, how?"

COMMODIFICATION

Bitcode packages technical knowledge into tradable, rights-bearing units.

"so making it tradable, how?"

OBJECTIVE (AUTO) MEASUREMENT

Bitcode objectively measures quantity, quality, and value without exposing protected source.

"cool. so what?"

CONNECTS IP SILOS

Bitcode connects disparate IP silos into a liquid market for AI-ready knowledge.

DEVELOPMENT

BUILDING THE INFRASTRUCTURE FOR AI KNOWLEDGE TRADING

01

PROTOCOL
SPECIFICATION
PUBLISHED

✓ COMPLETE

Canonical spec published and open-sourced.

02

COMMERCIAL
MVP
IN-USE

✓ COMPLETE

Live with design partners and real-world usage.

03

RAISE
WIP

Raising \$4M to scale protocol, product, and growth.

04

TEAM
BUILD
UPCOMING

Hire core team across engineering, product, and GTM.

05

\$BTD
LAUNCH
UPCOMING

Official \$BTD launch with protocol and exchange live.

06

COMMERCIAL
GROWTH
+ \$BTD GROWTH
UPCOMING

Accelerate adoption, liquidity, and \$BTD ecosystem value.

COMPLETED
Foundation is built

IN PROGRESS
Funding to scale

UPCOMING
Growth & network effects

EACH PHASE UNLOCKS THE NEXT LAYER OF THE BITCODE PROTOCOL ECOSYSTEM.

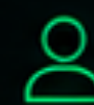

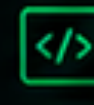

TRAPPED INTELLIGENCE SUPPLY

AI agents need proprietary technical knowledge,
but enterprises cannot safely expose, evaluate, price, or settle it.

AI DEMAND

Needs proprietary technical knowledge to build differentiated AI.

-  AI agents
-  Copilots
-  AI products
-  Model companies
-  Research orgs
-  Enterprise AI

ENTERPRISE SUPPLY

Valuable technical knowledge already exists inside enterprises.

-  Source code
-  Architecture
-  Tests
-  Tickets & docs
-  Workflows
-  Legacy systems

THE MARKET
DOES NOT CLEAR

1. WEAK BASELINE

AI relies on public context, generic knowledge, brittle RAG, one-off connectors, and manual access.

2. TRAPPED SUPPLY

Valuable knowledge is locked in repositories, docs, tickets, workflows, and legacy systems with no safe rails in or out.

3. LEAKAGE PARADOX

Buyers need proof of value before paying. Sellers cannot reveal source before settlement.

NO MEASUREMENT

NO PREVIEW

NO PRICING

NO SETTLEMENT

NO MARKET

MEASUREMENT CREATES THE MARKET

Bitcode measures data and bits for their knowledge value,
creating source-safe previews that unlock trapped intelligence supply.

MEASURE KNOWLEDGE, NOT FILES

Bitcode evaluates the knowledge
contained in data and bits for
reusable intelligence.

SOLVES THE LEAKAGE PARADOX

Buyers see proof of value before
settlement; producers keep source
withheld until rights transfer.

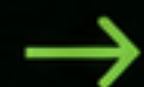

UNLOCKS TRAPPED SUPPLY

Trapped enterprise IP becomes
discoverable, priceable, and
exchangeable intelligence.

SETTLEMENT

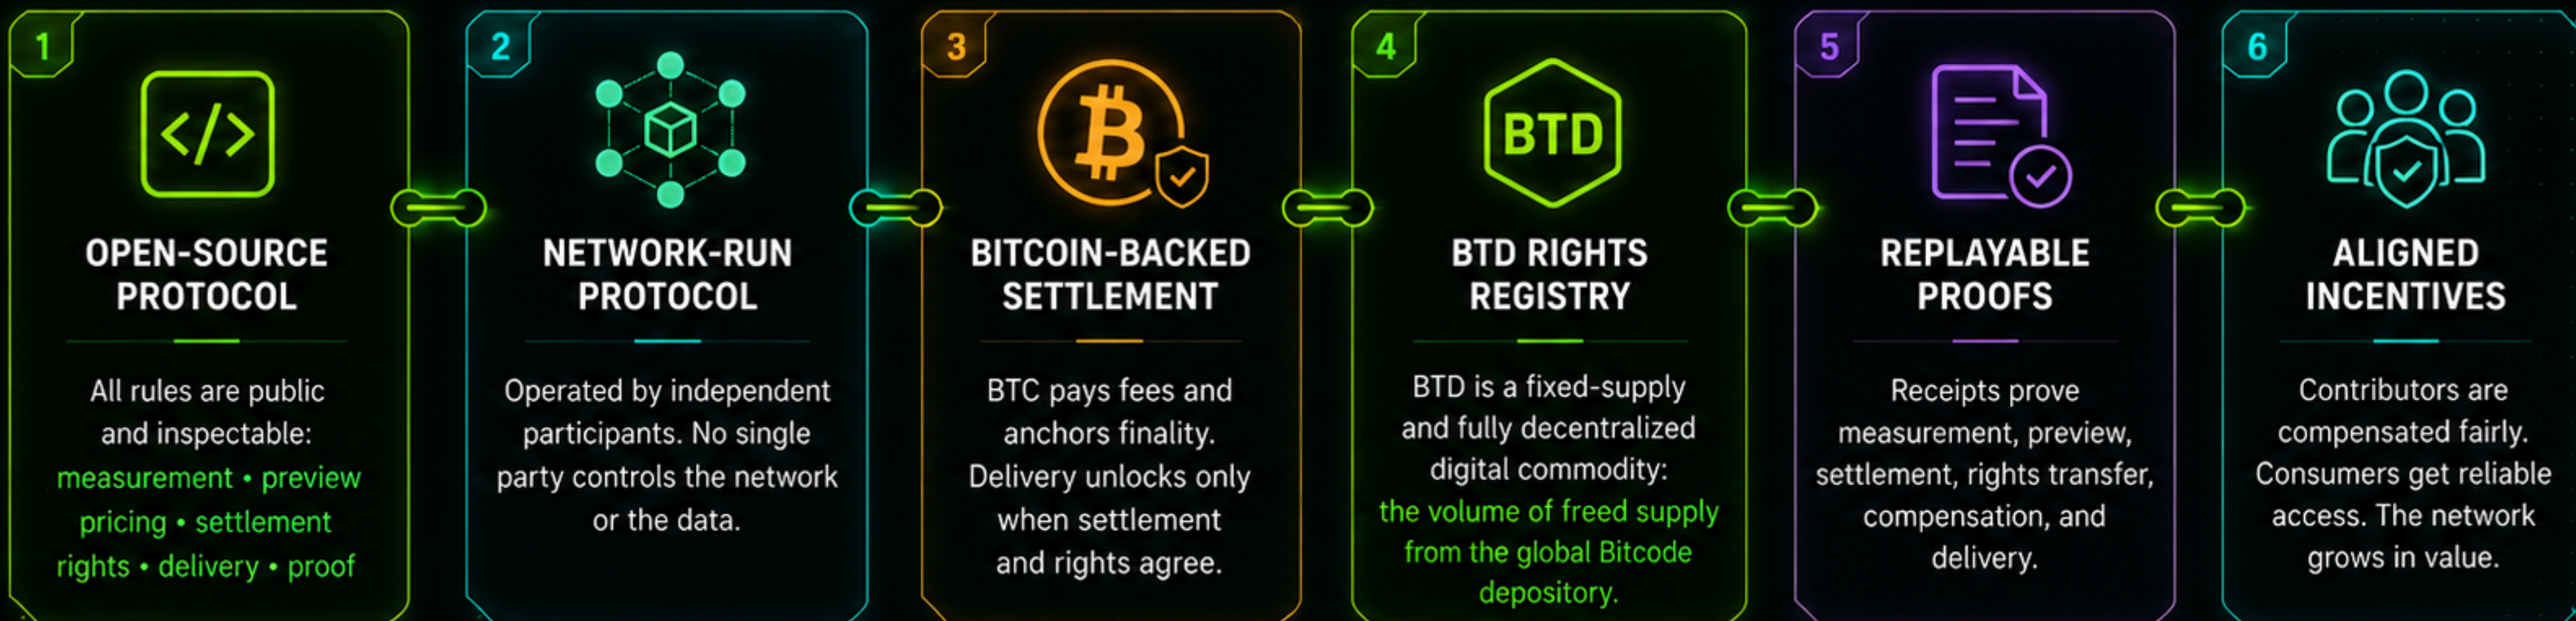

MARKET

TRUST RAILS FOR GLOBAL EXCHANGE

Open-source protocol, network-run infrastructure, Bitcoin settlement, and BTD rights create the trust rails for global intelligence exchange.

MARKET NEEDS

AI demand is scaling into agentic workflows while enterprises sit on trillions of dollars of technical IP and software spend.

THREE MARKET POOLS CONVERGE

\$644B

Gartner

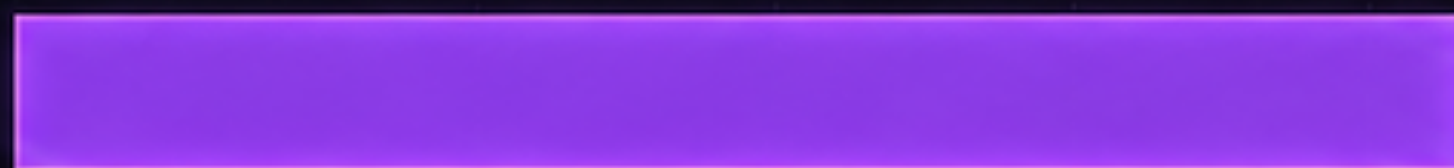

GenAI spend, 2025

\$3.8T

OECD

global R&D, 2024

\$5.61T

Gartner

global IT spend, 2025

0 1T 2T 3T 4T 5T 6T

AI DEMAND

- \$644B GenAI spend
- 33% enterprise apps agentic by 2028
- 82% expect digital labor

BITCODE RAILS

- Measure packaged technical knowledge
- Preview without leakage
- Price, settle, transfer rights, prove

ENTERPRISE IP SUPPLY

- \$3.8T R&D
- \$5.61T IT spend
- 180M developers
- 395M repos
- 1.12B contributions

Technical knowledge is already produced at multi-trillion-dollar scale.
Bitcode is the missing exchange layer.

ROADMAP + RAISE

\$4M pre-seed into Advanced Engineered Software, Inc. to convert the built protocol and commercial MVP into repeatable market traction.

RAISE

\$4M SAFE/T

\$20M pre-money
Advanced Engineered Software, Inc.

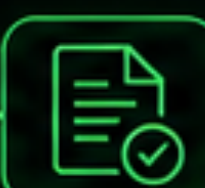

OPERATING PLAN

-  Build to ~10 people
-  Milestone-first plan
-  ~18 months fallback max

USE OF FUNDS

55%	 R&D & Infrastructure — protocol, product, measurement, integrations, infra
20%	 Sales, Marketing & Growth — GTM, design partners, pilots, developer growth
15%	 Legal & Finance — compliance, IP, globalization, custody, \$BTD readiness
10%	 Ops & HQ — recruiting, payroll, admin, tools, reserve

MILESTONE ROADMAP

-  1. ✓ Protocol specification published **COMPLETE**
-  2. ✓ Commercial MVP in real-world usage **COMPLETE**
-  3. Raise **WIP**
-  4. Team build **NEXT**
-  5. \$BTD launch **UPCOMING**
-  6. Commercial + \$BTD growth **UPCOMING**

\$BTD is minted from real Need-Fit demand — not deposit alone.

Fixed-supply digital commodity representing freed supply from the global Bitcode Depository.

NEXT RAISE:

Seed, traction-dependent

TRIGGER: repeatable paid knowledge exchange — supply deposited, Reads requested, previews reviewed, settlements completed, contributors compensated, proofs visible.
